

## COMPUTER SUPPORT PERMANENT EDUCATION OF SCHOOL LEADERS: E-LEARNING

*The possibilities of electronic technologies for the management of permanent training of heads of educational institutions. It revealed some fundamental differences from the benefits of electronic aids made typographically that defined advantages over traditional forms of allowances. It is proved that the development of electronic textbooks can be done in two ways: through open access to the global computer network Internet; for use in the classroom learning (LAN).*

*It describes the technique of preparation, creation and implementation of electronic aids. The main criteria for the selection of funds for the implementation of the electronic textbook. Examples of using the electronic textbook to organize permanent education students refresher courses in the system of postgraduate education. Takes advantage of E-learning tools that make managing multimedia resources are cheap enough to install them on personal computers. Attention is drawn to the shortcomings of most developers, the so-called electronic books, which offer a finished product and can not at the same time offer an efficient way to use this product because it does not possess psycho-pedagogical foundations of learning.*

*Who and why we need electronic aids? This question gives the answer we conducted the study.*

**Key words:** *electronic textbook, computer support, permanent education, the head of general educational institution, the system of postgraduate education.*
