

THE CONCEPT OF SAFETY EDUCATION

The necessity of safety courses studying system reform at universities is substantiated. The new concept of safety education based on risk oriented approach is proposed. The content of the course "Safety Management" is considered as the studying of risks and the methods of risk assessment, the risk management, the basics of civil protection and the governmental safety control.

Keywords: *emergencies, risk management, civil protection, state control, the concept of safety management, the development of educational standards, education concept of security.*
